Summary

As a web developer, developing applications that are easy for users to utilize is a top priority. Recently earned a certificate in full stack development from the UCLA Extension Program and learned skills in JavaScript, CSS, Node, Object Oriented Programming/Object Relational Mapping, React.js, MySql and responsive web design. With each project, the goal was to first make it function, then designing an engaging layout for users to enjoy. Teamwork was crucial to the process of developing these applications through organization and communication, without that, the applications would not work. For one project, we were able implement the MVC paradigm, which consisted of creating a back-end and front-end for an application that let users draw and publish their own drawings in the web app. These projects enhanced our new skills to this newly found passion, web developing.

Technical Skills

Languages: JavaScript ES6+, CSS3, HTML5, SQL, NoSQL, GraphQL
Applications: GitHub, MongoDB, MySQL
Tools: Express, React, Node, Handlebars, JQuery, Bootstrap, PWA, Semantics UI, Firebase, Stripe, Wordpress

Experience

Budget Tracker | **https://github.com/eramos3/Budget-Tracker** | **Link [https://bdget-traker.herokuapp.com/]**

- **Summary**: Web app that records your expenses/income
- **Role:** Creating Front-End and Back-End functionality
- **Tools:** IndexDB, MongoDB, Service Workers

Book Search Engine ||https://github.com/eramos3/book-search-engine | **Link [https://arcane-brushlands-36937.herokuapp.com/]**

- **Summary**: Google book search engine
- **Role:** Creating Front-End and Back-End functionality
- **Tools:** GraphQL, Server-Side API's, Local Storage, React, Bcrypt, Mongoose, Express

Meural| https://github.com/stepheff1994/second-group-project | **Link [https://meural.herokuapp.com/]**

- **Summary**: Interactive virtual art social app that taps into the canvas feature to allow users to draw and share.
- **Role:** Creating Back-End Functionality and took part in designing the UI
- **Tools:** Node Js, Express, mySQL, Sequelize ORM, Handlebars Js.

Calculator |https://github.com/eramos3/calculator | **Link [https://eramos3.github.io/calculator/]**

- **Summary**: Responsive Calculator application that runs on github pages
- **Role:** Designed and added custom functionality for this application
- **Tools:** Front End using React, JavaScript, and CSS

Education

Certificate, Full Stack Web Development – UCLA Extension   Los Angeles, CA
A 24-week intensive program focused on gaining technical programming skills in HTML5, CSS3, Javascript, JQuery, Bootstrap, Node Js, MySQL, MongoDB, Express, Handlebars.js & ReactJS.

Bachelor of Arts, Spanish — University of California Santa Barbara   Santa Barbara, CA
